

CREDIT CARD EXTENSION

Enhance Microsoft Dynamics® GP with integrated credit card processing.

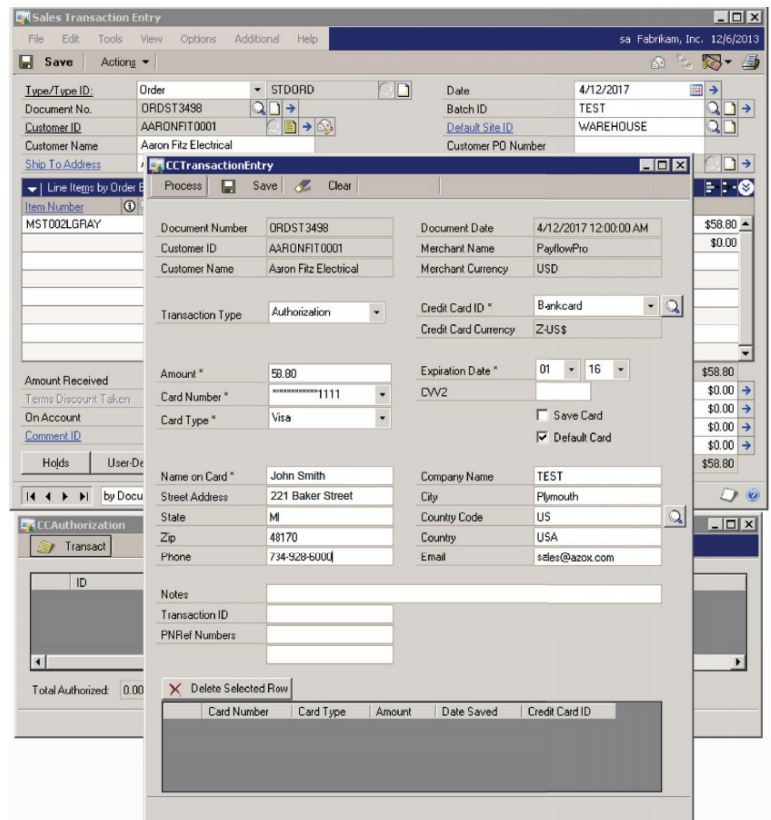

SECURE CREDIT CARD PROCESSING SOFTWARE

Credit Card Extension (CCE) integrates with multiple gateways providing reliable service and a PA-DSS Certified solution to process credit card transactions within Microsoft Dynamics® GP. Teaming with industry-leading providers, k-eCommerce offers real choices with the flexibility to configure the solution that best fits individual customer needs. Whether creating a new merchant account or maintaining a trusted relationship, CCE provides the highest levels of security and flexibility available in the industry

Featured included:

- Real-time payment processing
- Ability to process credit card transactions within multiple windows
- Encrypted storage & retrieval of multiple credit cards for each customer
- Supports multiple merchant accounts for each company
- Allows partial fulfillment of approved credit card transactions
- Batch processing

GET MORE OUT OF YOUR EPAYMENT SOLUTION

Credit Card Extension allows you to add more functionality to Microsoft Dynamics® GP. With more business conducted online, companies need to adjust to the demand in web orders. k-eCommerce realizes this need and allows for additional features to be easily added. That means, CCE can connect with our eCommerce solutions as well as our online bill pay module. All integrate seamless with Microsoft Dynamics® GP.

Featured included:

- Instant online pre-authorization for real-time online credit card processing
- Allows integration of a custom web store to Credit Card Extension
- Access to online reporting

HELP ADHERE TO PCI COMPLIANCE MANDATES

k-eCommerce Credit Card Extension has achieved Payment Application Data Security Standard (PA-DSS) Certification and adheres to the Payment Card Industry Data Security Standard (PCI-DSS). By being PA-DSS Certified, CCE offers the highest security standards to keep sensitive data from being compromised.

KEEP CARDHOLDER DATA SAFE AND OFFSITE WITH TOKENIZATION

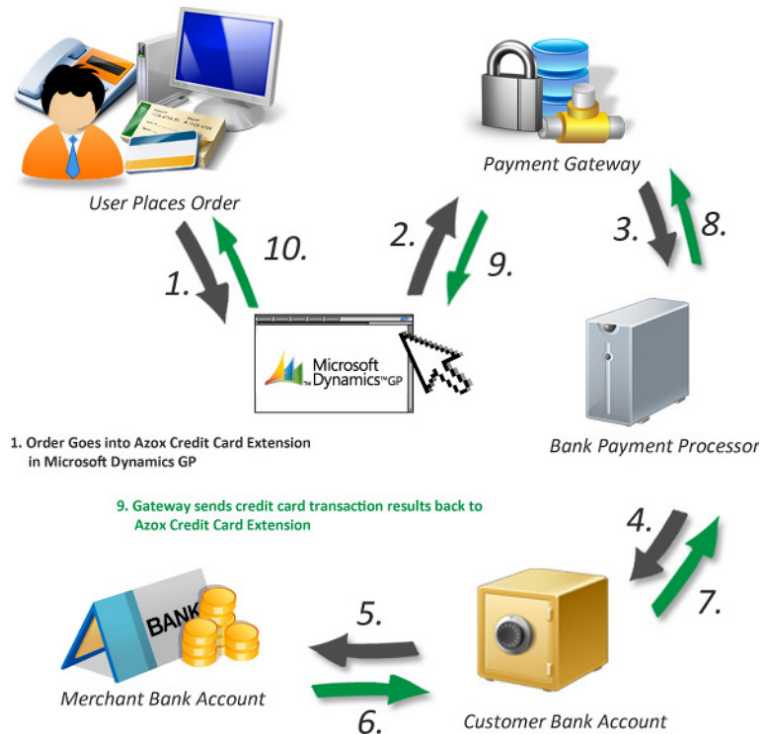

Tokenization technology can help alleviate the challenges that come with obtaining PCI compliance. With tokenization, a merchant can store credit card and account numbers on a third-party server, eliminating compliance liability concerns.
